**“Inject the explorer's spirit and shake up our perception of the world and the laws that govern it. Inspire industries to rethink the ways they produce and use energy, to move responsibly towards qualitative growth. These are the keys to finding tomorrow's solutions.”**

Bertrand Piccard

©Solar Impulse

**Dear valued visitors,**

Starting in March, sustainability has a new meeting place in Switzerland. For two days, the Sustainability Days will present a total of four platforms addressing the sustainable, environmentally conscious and future-oriented development of cities, spaces as well as the organisation of companies and the public sector. These are the congress and exhibition formats **SmartSuisse, Re' Summit, Future-Proof Infrastructure** and **MUT - Messe für Umwelttechnik (Trade Fair for Environmental Technology)**.

#### **First-hand insights and perspectives**

In addition to the presentation of the latest products, services and solutions, there will be best practice examples, insights into current development and research, and the presentation of new technologies. These will not only offer unique added value but also show what sustainability and the future can look like. You can expect high-calibre presentations from Switzerland and abroad.

#### **The time to act is now**

Against the backdrop of climate change, increasing urbanisation, a new environmental movement, and digital networking, Sustainability Days are making an active contribution as a future-oriented platform for a sustainable lifestyle of tomorrow. Of course, the topic of sustainability also plays a major role in the actual implementation of the event: from the location to system stand construction and catering.

Be a part of this event and benefit from the transfer of knowledge, networking and exchange – both within and outside your industry.

We look forward to your visit.

Julien Rousseau  
Brand Director Sustainability Days  
MCH Group

## SUSTAINABILITY DAYS'23

Get things done

### Target Groups

The Sustainability Days are aimed at professionals from various industries who want to address the issue of sustainability and play an active and sustainable role in shaping tomorrow's lifestyles.

- Decision-makers from politics and administration as well as from public transportation, energy and health care companies
- Companies and providers from the areas of mobility, infrastructure and ICT
- Builders, developers and investors
- Spatial and traffic planners

Decision-makers and operators from the following competence fields:

- Water and waste water treatment
- Waste management and recycling
- Decontamination of contaminated sites and soil treatment
- Exhaust emissions and exhaust air treatment
- Measurement and control technology
- Analysis and laboratory technology
- Climate change and natural hazards
- Operational environmental protection and environmental management
- Consulting, IT and engineering services
- 5th generation district heating and cooling networks, geothermal energy and synthetic gases

- Entrepreneurs, managers, sustainability and communication managers from companies in Switzerland
- Decision-makers from politics, administration, research and education
- National and international organisations, associations and federations
- Sustainability/management consultancies
- Certification bodies
- Suppliers of products/services in the field of sustainability

- Project developers who need funding and suppliers, as well as advisors for products and services
- Supplier companies who need access to projects or project developers
- Public institutions with plans for infrastructure investments
- Investors seeking access to project opportunities from public entities or project developers

## Sustainability Days – Two Days, Four Formats

Congress, exhibition and networking come together.

Sponsorship partners

Schweizerischer Städteverband  
Union des villes suisses  
Unione delle città svizzere

SmartSuisse is a congress with an accompanying exhibition addressing the topic of Smart Cities. SmartSuisse brings together decision-makers from cities, municipalities, business, science and trade associations to initiate a dialogue. The mix of congress and accompanying exhibition forms a perfect symbiosis and the opportunity for an interesting exchange.

### Key topics and congress structure

GOVERNANCE

MOBILITY

ENERGY &  
ENVIRONMENT

INFRASTRUCTURE

HEALTH

- Over two days (28 and 29 March), the programme offers you a balanced mix of keynote speeches and case studies on the different tracks and topics.
- Create your own programme structure and attend one session per category (A, B, C,...).
- You can also expect one panel discussion and cross-platform keynote per day.

Partner

sun21  
energy & resources

At the platform Re' Summit, the spectrum of topics ranges from corporate sustainability and climate protection to clean energy and sustainable procurement. At the accompanying exhibition, companies present their latest sustainability solutions, while developments are presented and discussed at the congress. The Re' Summit is aimed at companies, cantons, cities and municipalities as well as organisations, certification bodies and universities.

### Key topics and congress structure

CORPORATE  
SUSTAINABILITY

CLIMATE

ENERGY

SUSTAINABLE  
PROCUREMENT

- The sessions on **28 March** offer you a balanced mix of sharing knowledge, experiences and case studies on the two main topics of corporate sustainability and public sustainable procurement.
- The sessions on **29 March** offer you a balanced mix between keynotes and case studies on the different tracks and topics of climate, energy and sustainable procurement.
- You can also expect one panel discussion and cross-platform keynote per day.

## Sustainability Days – Two Days, Four Formats

Congress, exhibition and networking come together.

Partner

**Swissenviro.ch**  
Environmental Technology from Switzerland

MUT imparts concentrated knowledge and connects experts from the entire spectrum of Swiss environmental technology. It brings together various suppliers and users to facilitate an exchange on the latest developments and products for environmental protection. As part of the accompanying exhibition, regional specialist seminars will be held before, during and after the MUT to provide insight into current research, best practices and technologies.

### Key topics

WASTE COLLECTION,  
TREATMENT AND  
RECYCLING

EXHAUST EMISSIONS  
AND EXHAUST AIR  
TREATMENT

DECONTAMINATION OF  
CONTAMINATED SITES  
AND SOIL TREATMENT

OPERATIONAL  
ENVIRONMENTAL  
PROTECTION

WATER AND  
WASTE WATER

GEOTHERMAL ENERGY  
AND SYNTHETIC GASES

MEASUREMENT  
AND CONTROL  
TECHNOLOGY

ANALYSIS AND  
LABORATORY  
TECHNOLOGY

## FUTURE-PROOF INFRASTRUCTURE

Partner

The Future-Proof Infrastructure is targeted towards the global market. This English-language congress covers four regions: Americas, Europe, Asia and Pacific, as well as Africa and the Middle East. With curated early stage projects, the congress initiates the mediation between project developers and investors in the field of sustainable infrastructure projects.

The hybrid platform includes a physical event as well as a digital platform for the curated projects. A dedicated network brings together developers, public institutions, suppliers and investors on a community platform and gets sustainable infrastructure projects off the ground. Each project is carefully curated using generally accepted standards.

### Key topics and congress structure

NATURE AND  
CLIMATE

ENERGY AND  
MOBILITY

PEOPLE AND  
SOCIAL  
INFRASTRUCTURE

REGULATION,  
STANDARDS AND  
GOVERNANCE

DIGITAL AND  
INNOVATION

## Speakers & Presenters

Experts from Switzerland and abroad will present current developments, practical examples of successful initiatives, and technologies for a sustainable future for the economy, society and the environment.

**Bertrand Piccard**

Psychiatrist and Explorer

**Thomas Rau**

Entrepreneur, Architect, Innovator, Inspirer and Visionary

**Petteri Taalas**

Secretary-General of the UN Organisation WMO (Meteorology)

**Lukas Engelberger**

Government Counsellor, Head of the Department of Health of the Canton of Basel-Stadt

**Marco Lambertini**

Special Envoy and Former Director General WWF International

**Regula Rytz**

Historian, Former National Counsellor and President of the Green Party of Switzerland

**Alec von Graffenried**

Mayor of the City of Bern

**Frank M. Rinderknecht**

Founder and CEO Rinspeed AG

You can find an overview of all speakers at the Sustainability Days here

[sustainability-days.ch](https://sustainability-days.ch)

## Exhibition

The exhibition will feature companies presenting their latest urban and in-frastructure solutions, as well as the latest solutions on the topics of energy, climate and sustainable procurement. Products, services and solutions can be discovered and new contacts made at the central communication venue of the respective event.

At the MUT - Environmental Technology Trade Fair, leading suppliers from the industry present their products, innovations and solutions for environmental technology.

## Exhibitors and partners of the Sustainability Days at a glance

[sustainability-days.ch/en/provider](https://sustainability-days.ch/en/provider)

## Networking Dinner Party

The Networking Dinner Party on the evening of the first day is just one of many highlights, offering the opportunity for informal networking across all four platforms that take place in parallel during the Sustainability Days. Take this opportunity to establish further contacts who deal with the topic of sustainability for cities, spaces, the environment and the economy.

And let's not forget the entertainment programme: In addition to stand-up comedian Michel Gammenthaler, who will be the presenter for the evening, and psychiatrist and explorer Bertrand Piccard, the Swiss LED performers "The Blackouts" will fascinate the audience with a breathtaking show.

Wassermann & Company AG, Messe Basel's exclusive catering partner, is committed to transparency when it comes to the origin of its products. The company's work is also based on a conscious approach to food and the use of ecological packaging units. It additionally sees itself as a sparring partner for organisers, highlighting sustainable alternatives to existing concepts.

Day ticket: CHF 430 including VAT per ticket

Two-day ticket + Networking Dinner Party: CHF 750 including VAT per ticket

### MUT – Environmental Technology Trade Fair

Two-day ticket: CHF 30 including VAT per ticket

### Sustainability Pass

Two-day ticket for all platforms +  
Networking Dinner Party: CHF 790 including VAT per ticket

### Networking Dinner Party

Tickets: CHF 350 including VAT per ticket

**Get your ticket now**

[sustainability-days.ch/en/tickets](https://sustainability-days.ch/en/tickets)

## Venue

In the heart of Basel we have the right location to plan the future with you - and we approach environmental sustainability in a highly practical manner: We make sparing use of resources on our premises, support regional producers, use solar power and, in the case of building measures, opt for those offering the greatest possible energy efficiency.

We look forward to your visit.

---

## Directions

We recommend that you arrive by public transportation. The Congress Center Basel can be reached within five to ten minutes from the three local railway stations SBB (Switzerland), SNCF (France) and Badischer Bahnhof (Germany).

Tram line 1 or 2 from the SBB/SNCF station will take you to the “Messeplatz/Exhibition Square” stop and thus to the Congress Center in ten minutes. From Badischer Bahnhof you can reach the Congress Center in two stops by Tram line 2 or 6.

## Venue

Congress Center Basel  
Messeplatz 21  
4058 Basel, Switzerland
